Readline Terminal Shortcuts

[Companion YouTube Video](#)   [Other Free Documents](#)

key combo	action	key combo	action
Ctrl + u	cut everything before cursor	Ctrl + k	cut everything after cursor
Ctrl + w	cut previous word	Ctrl + y	paste
Ctrl + -	undo	Ctrl + l	clear
Alt + f	move forward one word	Alt + b	move backwarck one word
Alt + .	print last argument	Alt + t	swap last two words
Alt + d	delete to end of word	Alt + backspace	delete to beginning of word
Alt + l	lowercase to end of word	Alt + u	uppercase to end of word

notes

- Use `bind -p` to see all key bindings
- The shortcuts here are emacs bindings. They don't work if vim mode is set (`set -o vi`)
- Some of the `Ctrl` shortcuts work in the insert mode in Vim too (only on the new content)
- `Alt` may be replaced by `Esc`
- Due to my custom keyboard layer, I don't use the following shortcuts

key combo	action	key combo	action
Ctrl + a	go to beginning of line	Ctrl + e	go to end of line
Ctrl + b	left arrow	Ctrl + f	right arrow
Ctrl + d	delete	Ctrl + h	backspace
